PDL BioPharma Provides First Quarter 2012 Royalty Revenue Guidance of \$77 Million

INCLINE VILLAGE, NV, March 08, 2012 – PDL BioPharma, Inc. (PDL) (NASDAQ: PDLI) today announced royalty revenue guidance for the first quarter ending March 31, 2012, of approximately \$77 million, as compared with actual royalty revenue of \$73 million for the first quarter of 2011, a five percent increase. Total revenue for the first quarter of 2012 is expected to be \$6 million less than total revenue for the first quarter of 2011. The decline in expected total revenue is largely attributable to the \$10 million settlement received from UCB Pharma S.A. (UCB) in January 2011 resolving all legal disputes between the two companies, including those relating to UCB's pegylated humanized antibody fragment, Cimzia®, and PDL's patents known as the Queen et al. patents.

The forecasted growth in royalty revenues is driven by increased fourth quarter 2011 sales of Herceptin[®], Lucentis[®], Xolair[®] and Tysabri[®] for which PDL receives royalties in the first quarter of 2012. Sales of Avastin[®], Herceptin, Lucentis and Xolair (the Genentech Products) are subject to a tiered royalty rate for product that is made or sold in the United States and a flat royalty rate of three percent for product that is manufactured and sold outside of the United States (ex-US manufactured and sold). The net sales thresholds and the applicable royalty rates for the Genentech Products are outlined below:

Genentech Products Made or Sold in US	Royalty Rate
Net sales up to \$1.5 billion	3.0%
Net sales between \$1.5 billion and \$2.5 billion	2.5%
Net sales between \$2.5 billion and \$4.0 billion	2.0%
Net sales exceeding \$4.0 billion	1.0%
Genentech Products Made and Sold ex-US	
Net sales	3.0%

The first quarter royalty payment received from Genentech included royalties generated on all worldwide sales.

Revenue guidance for the first quarter of 2012 is net of an estimated payment due under our February 2011 settlement agreement with Novartis AG (Novartis). PDL pays to Novartis certain amounts based on net sales of Lucentis made by Novartis during calendar year 2011 and beyond. The amount paid is less than we receive in royalties on such sales.

Reported worldwide sales of Herceptin increased nine percent in the fourth quarter of 2011 when compared to the same period in 2010. Roche recently reported that in 2011, Herceptin global sales growth was driven by expanded access in developing countries, increased and improved HER2 testing and continued uptake in HER2-positive stomach cancer. Additionally, Roche reported that sustained double-digit increases were recorded internationally, with strong demand in Latin America and the Asia-Pacific region. Ex-U.S. manufactured and sold Herceptin sales represented 35 percent of total Herceptin sales in the fourth quarter of 2011 as compared with 40 percent in the fourth quarter of 2010.

Reported worldwide sales for Lucentis increased 22 percent in the fourth quarter of 2011 when compared to the same period in 2010. Lucentis is approved for the treatment of age-related macular degeneration (AMD) in the U.S. and Europe. Lucentis received approval for the treatment of macular edema following retinal vein occlusion (RVO) in June 2010 in the U.S. and in June 2011 in Europe. In January 2011, Lucentis was also approved in Europe for the treatment of visual impairment due to diabetic macular edema. Roche recently reported that strong U.S. sales growth was driven by growth of the AMD market and the new RVO indication. All sales of Lucentis were from inventory produced in the U.S.

Reported worldwide sales for Avastin decreased six percent in the fourth quarter of 2011 compared to the same period in 2010. Roche has recently reported that a significant portion of the decline in sales in the U.S. was due to reimbursement uncertainty regarding the metastatic breast cancer indication, which was revoked by the U.S. Food and Drug Administration in November 2011, and that U.S. market share for all other indications remained stable. In Europe, austerity measures along with lower use of Avastin for breast cancer led to lower sales, but market penetration in colorectal cancer remained stable. The decrease in sales was offset by an increase in royalties due to a shift in ex-US manufactured and sold product with 27 percent of total sales in the fourth quarter of 2011 generated from ex-US manufactured and sold product compared to 19 percent in the same period in 2010.

Reported worldwide sales for Tysabri increased 14 percent in the fourth quarter of 2011 compared to the same period in 2010. Tysabri royalties are determined at a flat rate as a percentage of sales regardless of location of manufacture or sale.

The sales information presented above is based on information provided by PDL's licensees in their quarterly reports to the Company as well as from public disclosures made by PDL's licensees.

• The failure of licensees to comply with existing license agreements, including any failure to pay royalties due.

Other factors that may cause PDL's actual results to differ materially from those expressed or implied in the forward-looking statements in this press release are discussed in PDL's filings with the SEC, including the "Risk Factors" sections of its annual report filed with the SEC. Copies of PDL's filings with the SEC may be obtained at the "Investors" section of PDL's website at www.pdl.com. PDL expressly disclaims any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements contained herein to reflect any change in PDL's expectations with regard thereto or any change in events, conditions or circumstances on which any such statements are based for any reason, except as required by law, even as new information becomes available or other events occur in the future.
